Skills

HTML · CSS · JavaScript · Node.js · Java · Bootstrap · Figma · Photoshop
cPanel · Weebly · SQL · Postman · Bash · Git · GitHub

Experience

Kahua

FRONT END WEB DEVELOPER

January 2021 - May 2021

- In my University Senior Project I worked alongside a few other students to create a customer management system for Kahua to organize and display their customer database information in dashboards.
- I designed prototypes to present at client meetings, developed the front end interface with React modules, and worked with our team on the Software Requirements Specifications to manage our teams production cycle.
- Project Technology: HTML, CSS, JavaScript, React, Node.js, Express.js, Figma, Photoshop, SQL, Bash, Git, GitHub, hosted on Kahua local servers

Melee Majors

WEB DEVELOPER & FOUNDER

June 2021 - Present

- I founded a small eSports organization that maintains a schedule for the largest events in the Super Smash Bros Melee community.
- For a competitive gaming community thousands of members wide, there were too many tournaments occurring weekly for fans to keep up with when the largest major tournaments were taking place.
- This simple website and organization has remedied that problem completely and averages over 30,000 page hits each month.
- Project Technology: HTML, CSS, JavaScript, Figma, Photoshop, cPanel, Bash, Git, GitHub, hosted on VeeroTech

Speech Therapy of Forsyth

CMS WEB DEVELOPER

Fall 2018

- Speech Therapy of Forsyth contracted me to revamp their business website and social media presence.
- I developed them a new website and url using Weebly, optimized their google search rankings to the number one spot, and launched a Facebook business page which began online engagement with their clients.
- Our partnership greatly helped their clinic find new clients and before my contract ended I taught them how to use Weebly's content management system to update their site for the future.
- Project Technology: Photoshop, Weebly, hosted on Weebly

Synergy Promotions

GRAPHIC DESIGNER

Summer 2017

- I was contracted to create graphic design prototypes of cigar bands for a cigar bar called Hot Ashes.
- Project Technology: Adobe Photoshop

Marco's Pizza

DELIVERY DRIVER

June 2017 - Present

- I deliver food orders to customers, clean the dishes, sweep the floors, take out the trash, help new employees adjust to the work flow, and take care of any additional tasks that come up.
